

Suitable for all types of breast cancer, cosmetic breast and cardiothoracic surgeries

RECO BRA[®] is the first ever post-surgical bra to have the Maedical™ technological revolution applied to the fabric lasting the lifetime of the garment. The advanced antimicrobial reduces the infection risks from microorganisms and other hospital infections.

- Seamless design with built in compression zones.
- Shoulder strap and front opening alternatives that provide adjustability.
- Breathable and moisture permeable fabric with Maedical™ technology which reduces odour and maintains garment freshness for longer.
- Flexible sizing and cup concept to make fitting easier.
- Gauging pleat design in the breast area for cases of bilateral and unilateral mastectomies patients can choose to wear a light prosthesis or nothing.
- Provides implant stabilisation and minimises swelling with the correct and comfortable compression.

“ The **RECO BRA**[®] is designed at every level from material to shape, specifically for the post-surgery setting and ticks all of the boxes for me and my patients”

Mr Paul Harris BSc MD FRCS (Plast) - The London Clinic

“ I have received nothing but positive feedback from my patients and they all loved wearing the **RECO BRA**[®] in their recovery phase”

Mr Giles Davies Bsc MD FRCS (Gen.Surg) - The King Edward VII London Hospital
